Education Background

Year in school:

Projected graduation date:

Major(s) and Minor(s):

Current GPA:

Current area of interest (i.e. anxiety, depression, children, etc.):

Plans after graduation (i.e. masters, PhD, etc.):

Education and Skills

Please list any research methods or statistics courses you have taken.

Please list any other courses that you have taken that may be relevant to this lab.

Please list any computer skills you have/software you are familiar with.

Is there anything else you'd like to include that may be relevant to a position in the RAD Lab?

Research Experience

Do you have any previous research or relevant experience?

Yes

No

If so, what projects, with who?

What were your responsibilities?

Do you have any experience interacting with participants in a psychology study? If yes, describe:

What did you enjoy most about your previous research experience? OR What do you think you will enjoy most about the research process?

Why do you want (more) research experience?

Project Specifics

Why were you interested in working in the RAD Lab?

Are there any specific projects you are interested in and why?

When are you interested in being an RA in the lab? (Spring, Summer, Fall)

How long would you be able to stay as an RA (DIS or volunteer) in the lab?

How many hours/credits are you interested in doing?

Are you interested in:

An honors thesis

UROP

Other

Nothing particular, just more experience ☺
